

**A- Read the following text then do the tasks below:**

A volcano is a hole in the Earth's surface which pushes out hot, liquid rock. There are about 800 active volcanoes in the world. A volcanic **eruption** is very powerful, as hot ash and gas are blown into the air. The liquid rock flows out of the volcano towards towns and villages. The gas and ash can blow all over the globe, causing changes to the weather. After a volcano erupts, sunlight can be reduced and crops can die. Volcanic eruption can be predicted by scientists, which helps save life. Hurricanes are storms. Air rises over warm tropical seas and starts going round in circles. They are very dangerous-trees and buildings are **destroyed**, and towns are **flooded** by the rainfall.

**B- Read the following text then do the tasks below:**

Can lightning strike you when are indoors? Yes, it can, and every day, over 1,000 people get hit by lightning this way. When lightning strikes a phone line, it travels down the phone line, and if you are holding the phone at that time, it will reach you. So, if there is a lightning storm, you shouldn't use the phone. You shouldn't be in the bath or shower, either, because lightning can strike metal pipes and cause an electric shock. It's best to stay away from computers too-anything that can carry an electrical charge from the lightning to your body.
