Parents want their children to opt for a career they know well about, but what their children want or aspire to become can be completely different. Many parents said they had misguided their children into choosing a career of their choice. It is very important not to burden our children with unreal expectations. There are a few factors that are of great importance in the career selection process. The child's aptitude is a mirror of his/her personality, strengths, and weaknesses. Hence, a designed aptitude test can reveal a lot of information regarding the child that can help in taking a well-informed career selection. It is very difficult to spend your life working in a field that you are not interested in. Most people think that education is limited to schools only, but the truth is that there are lessons that we can only learn from life, and they may be more important than those learnt at schools.
